

Description

Exocet Petrol Supreme is used to upgrade BS EN 228 unleaded petrol into a premium quality fuel equivalent to the highest forecourt standard available.

Application

Many petrol users now want to take advantage of low-priced 'supermarket' fuel but may be unsure as to its provenance or quality. Furthermore, a number of people is concerned about the increased use of ethanol as a bio-component of petrol. Use of Exocet Petrol Supreme ensures that any concerns over fuel quality are eliminated and that even branded fuel is top-treated to achieve much enhanced performance.

Features

- Cleans up and keeps clean fuel injectors
- Improves driveability and throttle response
- Increases fuel economy
- Contains an octane booster to reduce 'pinking' potential
- Controls combustion chamber deposit build-up
- Reduces unwanted emissions
- Protects against ethanol-based corrosion

All exocet™ branded products are available in a range of sizes to 1,000 litres

Each 1 litre bottle treats up to 250 litres of unleaded petrol
